

Eagle Conferencing Introduces free Conference Call in India.

Indian companies will be able to run audio conferences in India without incurring any charges

Bangalore – July 27, 2010 – Eagle Conferencing (www.eagleconferencing.in), in a groundbreaking move today launched their free conferencing scheme in India for conference calls. This innovative and aggressive pricing scheme allows any small and medium businesses to operate audio conferences in India without incurring any call charges. With unique services that offered to millions of consumers in India can now enjoy a call experience free of charge with an unmatched and reliable voice quality that has never been possible before.

This 3 For Free service for personal as well as corporate use, without incurring conference bridge call fees, is available to all existing as well as new customers for unlimited usage. The Eagle Conferencing plan provides access to audio conference call service that supports calls for up to three participants. The conference chairperson has access to the full range of call management facilities of award-winning and the state-of-the-art conferencing services.

This most attractive offering should bring a paradigm shift and re-define the future on Indian telecom sector. This significant development is a part of our overall commitment to provide consumers with no barriers, quality service and global reach to millions of Indian customers regardless of their size. This introduction demonstrates Eagle Conferencing's scalability to enable consumers with a bouquet of global telecom value added services. The fast growing Indian conference call market has inspired us to transform telecom industry dynamics and reinvent pricing models.

Eagle Conferencing with almost 25 years of global infrastructure and operations experience with over 10 billion minutes of annual calling traffic capacity, is one of the global leader in the facility based conferencing services. The conferencing solutions provided by Eagle Conferencing have been instrumental in forming the communication backbone of the entire switching and transmission communications value chain. Allowing the bridge facility free of charge to communicate in India supports the communication delivery structure which has contributed in our efforts towards strengthening economic and social development in India.

About Eagle Conferencing

Eagle Conferencing, an affiliate of EagleNet companies, offers audio and web conferencing services. Its services are offered in the USA, India, U.K., Netherlands, France and Germany. Eagle Conferencing's secured and scalable network infrastructure, with its global bridge capacity of 28,000 ports provides over 10 billion minutes of annual calling traffic facility. To unleash the full power of scalability and flexibility, Eagle Conferencing has a worldwide network connection infrastructure, and offers a variety of conference options for productivity. Eagle Conferencing India has its state of Art conferencing set up in Bangalore at International Technology Park Limited, and at data center in Mumbai. Both of these facilities are designed to support uninterrupted services to its valuable corporate clientele.
